

DAKSH CHAUDHARY

Full Stack Developer · React / React Native · AI-Integrated Products

dakshchaudhary2668@gmail.com • +91-9119722668 • github.com/DakshChaudhary2668 • linkedin.com/in/daksh-chaudhary-2668-meerut

PROFESSIONAL SUMMARY

Builder-mindset developer crafting production-grade, AI-integrated web and mobile products. Proficient in React, React Native, and the MERN stack; currently expanding into DevOps and scalable backend systems. Selected among Top 85 in Scaler YIIC 4.0 and hackathon finalist with a shipped AI platform. Driven to ship products that solve real problems — not just complete coursework.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, HTML5, CSS3

Frontend: React.js, React Native, Next.js, Tailwind CSS, Responsive Design, Component Architecture

Backend: Node.js, Express.js, REST APIs, JWT Auth, Flask

AI / ML: OpenCV, MediaPipe, BlazePose, Groq AI, Pose Estimation, AI API Integration

Databases: MongoDB, PostgreSQL, SQLite

DevOps & Tools: Git, GitHub, Vercel, Render, VS Code, Electron

Concepts: MERN Stack, Dual-DB Architecture, Real-Time Systems, ATS-Optimized UX, PWA

PROJECTS

GymBro — AI Fitness Platform | *React Native · OpenCV · MediaPipe · BlazePose · Node.js*

- Architected a **startup-grade mobile fitness app** with real-time **AI pose tracking** using MediaPipe/BlazePose to detect and correct exercise form frame-by-frame.
- Built an **AI engine that generates personalized workout and diet plans** from user biometrics; integrated voice interaction for hands-free in-workout guidance.
- Designed a **gamified fitness progression system** (streaks, XP, milestones) to drive daily retention — inspired by consumer app engagement loops.
- Delivered **real-time rep counting and form-correction feedback** with <100ms latency using optimized computer vision pipeline.
- Implemented **personalized analytics dashboard** tracking performance trends, caloric burn, and weekly progress across muscle groups.

macOS Portfolio — Premium Developer Productivity Ecosystem | *React · Next.js · TypeScript · Tailwind CSS · Electron*

- Engineered a **native macOS-inspired developer portfolio** with pixel-perfect UI fidelity — Spotlight search, Dock navigation, multi-window management, and fluid spring animations.
- Applied **Apple HIG (Human Interface Guidelines)** principles throughout; optimized for 60fps interactions with CSS GPU compositing and React virtualization.
- Built a **component system inspired by macOS design tokens** — consistent typography, blur effects, translucency layers — in a fully responsive TypeScript/Tailwind architecture.
- Demonstrates **senior-level product thinking**: zero external UI libraries, custom-built primitives, and sub-2s Lighthouse performance score.

TeamFit AI — Real-Time Collaborative Coding Platform | *React · Flask · PostgreSQL · JWT · Groq AI*

- Built a **hackathon-winning collaborative IDE** with session-based workflows, secure invite codes, and **keystroke-level contribution tracking** per participant.
- Integrated **Groq AI to generate live performance insights** from coding activity — giving professors transparent, data-driven team evaluation reports.
- Engineered **dual-database architecture** (SQLite dev / PostgreSQL prod) with automatic fallback — zero-downtime deployment-ready.
- Shipped **full-stack in 24 hours**: JWT auth, secure API layer, Vercel (frontend) + Render (backend) CI/CD pipeline.

Smart Medi Connect — Healthcare Web Platform | *React · Node.js · Express · MongoDB · Vercel* [🔗 Live](#)

- Developed a **modular, scalable React frontend** for a healthcare platform with reusable component library and responsive cross-device UI.
- Architected project following **production MERN conventions**: lazy loading, route-level code splitting, and Vercel edge deployment for global <50ms TTFB.

ACHIEVEMENTS & RECOGNITION

- Top 85 / ~10,000+** — Scaler YIIC 4.0 Internship Program (national-level competitive selection).
- Hackshastra Hackathon Finalist** — Built and shipped TeamFit AI (AI collaborative coding platform) in 24 hours.
- Actively maintaining **3+ production-deployed projects** with real users and live infrastructure.

EDUCATION

Bachelor of Computer Applications (BCA) · IMS Ghaziabad · 2025 – Present

- ▶ Pursuing BCA while shipping production products — treating every project as a real startup, not a classroom assignment.
